🌟 About Me

I'm a fullstack developer who loves building real-world solutions that solve everyday problems. I combine strong frontend skills with solid backend logic to create complete, user-focused applications. Currently building an AI voice assistant to automate tasks and developing products that simplify learning and productivity. Always learning, always building.

🐟 Education

Lagos State University, Lagos, Nigeria \ *B.S. & M.S. in Educational Technology* – Expected May 2026

- Concentrations: Intelligence, Modeling & Simulations
 - GPA: 3.5 / 4.00, Dean's List
 - Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Machine Learning, AI, Statistics & Applications
-

🌙 Experience

Freelance Fullstack Developer | Self-Employed

Lagos, Nigeria | 2020 – Present

- **Church Fellowship CRUD Website (2024):** Built a fullstack web app for a local church fellowship to manage members, events, and attendance. Used React.js for frontend, Node.js and Express for backend, and MongoDB for data storage. Improved fellowship coordination and member management efficiency by 50%.
- **Resource Haven (2024):** Developed an online resource hub to share tech tools and curated learning materials for students and developers. Implemented with React, Node.js, and Supabase for data storage and auth.
- **SMS Sender Web App (2024):** Created an app that sends bulk SMS to multiple recipients with easy contact uploads. Built with React, Node.js, and integrated a third-party SMS API, reducing manual SMS sending efforts for small businesses.
- **Dev-Info Platform (2024-Present):** Founded and built a platform to assist beginner programmers with curated resources and interactive tools. Integrated user authentication for 100+ users and community features for collaboration.

- **AI Voice Assistant – Reabot6 (2025-Present):** Currently building an AI-powered assistant that automates tasks like opening apps, setting reminders, and controlling devices via voice commands using Node.js, Python APIs, and upcoming NLP integrations.

Teaching Assistant | Lagos State University

Lagos, Nigeria | 2024

- Assisted in teaching introductory programming courses, simplifying complex topics in JavaScript and algorithms for over 50 first-year students to improve comprehension and confidence in coding.

Projects

- **Dev-Info Platform:** React, Node.js, MongoDB – Learning platform for programmers with resources and community features.
- **AI Voice Assistant (Reabot6):** Node.js, Python APIs – Task automation and device control via voice commands.
- **Resource Haven:** React, Node.js, Supabase – Central hub for curated tech resources.
- **Church Fellowship CRUD Website:** React, Node.js, MongoDB – Member and event management system.
- **SMS Sender Web App:** React, Node.js, SMS API – Bulk SMS sender with contact uploads.
- **Student Productivity App:** React Native, Firebase – Cross-platform planner for students to track study routines and deadlines.

Leadership & Activities

- **Dev-Info Community – Founder & Coordinator | 2024 – Present:** Built a thriving community of 100+ beginner programmers. Organised workshops to teach practical web and AI skills.
- **Open Source Contributions:** Contributed to small open-source frontend components and API integrations to strengthen collaborative coding skills.
- **Content Creation:** Share learning breakdowns, dev tips, and AI explorations on [X \(Twitter\)](#) to over 200 followers, building a learning-in-public portfolio.

Technical Skills

Languages: JavaScript, Python, Java, TypeScript\ **Frontend:** React.js, Next.js, Tailwind CSS, SCSS, HTML5, CSS3\ **Backend:** Node.js, Express.js, Supabase, Firebase, REST APIs, basic GraphQL\ **Databases:** MongoDB, SQL, Supabase\ **DevOps & Tools:** Git, GitHub, Vercel, Netlify, AWS basics, npm, VS Code\ **Testing:** Jest, React Testing Library (learning)\ **Design:** Figma (UI/UX basics), Canva\ **Other:** Agile methodologies, Scrum basics\ **Languages Spoken:** Fluent in English and Yoruba

✨ What Makes Me Stand Out

- Built **real products solving actual problems** (church management, student productivity, resource hubs)
- **Consistent learning and application** – from frontend to backend, deploying live solutions
- **Community leadership and teaching** experience, showing communication and teamwork skills
- Currently building an **AI voice assistant product** to expand skills into AI integration and NLP
