EDUCATION

Lagos State University   **Lagos, Nigeria**

B.S. & M.S. in Educational Technology   *Expected Graduation, May 2026*

- **Concentrations:** Intelligence and Modeling/Simulations
- **GPA:** 3.5/4.00, *Dean's List*
- **Related Coursework:** Data Structures & Algorithms, Objects & Design, Computer Organization & Programming,n

Combinatorics, Machine Learning, Artificial Intelligence, Object-Oriented Programming,
Statistics & Applications

EXPERIENCE

Self-Employed | Lagos, Nigeria
2020 – Present

- Designed and developed custom websites for small businesses and personal brands, leveraging technologies like HTML, CSS, JavaScript, and React.js.
- Implemented APIs for seamless data handling and automation of client workflows.
- Created mobile-responsive designs and interactive user interfaces for better customer engagement.

PROJECTS

Dev-Info Platform
Founder & Developer | Lagos, Nigeria
                          |2024 – Present

Conceptualized and built a platform to assist beginner programmers with curated resources and interactive learning tools.

Integrated user authentication, allowing over 100 users to create accounts and track their progress.

Designed community-driven features for collaborative learning and support.

AI Voice Assistant (Reabot6)
Developer | Lagos, Nigeria
            | 2024 – Present

Designed an AI-powered assistant to automate tasks such as opening apps, setting reminders, and controlling devices through voice commands.

Focused on smooth deployment with a focus **on API-driven automation.**

Designer & Developer | Lagos, Nigeria

|2023-present

Recognizing the challenges faced by students in my department, I developed a cross-platform app to address issues like disorganized study routines and missed deadlines.

Designed features tailored for students, including personalized time tracking, subject-specific daily planners, and smart reminder systems to improve focus **and task management**.

Integrated APIs to enable seamless task synchronization across devices, ensuring students could access their schedules anytime.

Conducted usability testing within the department, gathering feedback to refine the app for better usability and impact.

This app significantly enhanced students' ability to stay on top of their academic workload and achieve better study outcomes.

ACTIVITIES AND LEADERSHIP

Dev-Info Community

Founder and Coordinator | Lagos, Nigeria

Team **Lead**   **2024 – Present**

Built a thriving online community for beginner programmers with over 100 active users.

Organized workshops and tutorials to guide members in building practical tech skills.

Teaching Assistant

Educational Technology Department, Lagos State University

2024

Assisted in teaching introductory programming courses, helping students grasp complex concepts through simplified explanations**.**

Programming:JavaScript, React.js, Python, HTML, CSS, Node.js, SQL, SCSS, Java
Tools & Platforms:Git, MongoDB, AWS, Figma, Jupyter Notebooks, Chart.js, Agile
Languages:Fluent in English and Yoruba
